• **Health care services** بالبداية بدنا نعرف عن

1 - promotion .

2 - protection .

3 - Curative care .

4 - Rehabilitation .

غير مقتصرة على العلاج فقط X

~~There are 3 levels of health care :~~

1 - primary Health Care

• اهم واحد
principle ofHEALTH FOR ALL

• Examples :

~Sub centre .

~Primary Health Centre.

~Community Health Centre .

FIRST CONTACT

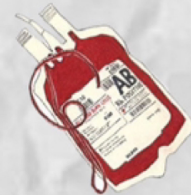

CLOSEST TO THE PEOPLE

> Provided by primary care physician ;

General practitioners, family physician ,

non-physician primary care provider ~

physician assistant or nurse practitioner

• **primary health care** أهم معايير

ACCESSIBLE. ACCEPTABLE. FULL PARTICIPATION
AFFORDABLE COST

: Primary care physicians ~ أهم وظائف

Checkups and routine tests

Minor illness

Keep records

**Coordinate health care with specialists
THROUGH REFERRALS**

2 - Secondary Health Care

- **INTERMEDIATE LEVEL OF HEALTH CARE .**
- **The First REFERRAL level.**
- **provided by DISTRICT hospital .**
- **CURATIVE services .**

**> provided by a specialist or facility upon REFERRAL by
PRIMARY HEALTH CARE PHYSICIAN .**

**> Requires more specialised Knowledge, skills, or equipment
than the primary health care.**

- **SPECIALISED CONSULTATIVE .**
- **ADVANCED medical investigations and treatment.**
- **SUPER Specialist care .**
- **Provided by TEACHING hospitals .**
- **provide TRAINING PROGRAMS .**

**> Referral from primary or secondary health
care professionals.**

Levels of Care

Primary Care

- Prevention, diagnostic, therapeutic svcs., health education, minor surgery
- Primary care is an “approach to providing health care”

Secondary Care

- Short-term
- Sporadic consultation with specialist for advanced interventions not available in PC

Tertiary Care

- For conditions that are relatively uncommon: → بعض الحالات النادرة Tertiary care
- Institution-based, highly-specialized (e.g. open-heart surgery)
